MASTER OF SCIENCE IN BIOLOGY

### Attendance list for master's colloquia (2 ECTS points, i.e. 20 lectures required)

In order to successfully finish the Master of Science in Biology program (both the one and two year program), you are required to attend 2 ECTS points worth of colloquia. This means that you have to attend 20 scientific lectures during the master's program.

The lectures must be about 45 minutes (or more) followed by a discussion, and you are encouraged to actively engage in the discussion at the end by asking questions. Scientific lectures at and talks of invited speakers hosted by e.g. the various graduate schools, Gene Center, Biochemistry and the Max Planck Institute are considered to be colloquia for this purpose. Regular work group seminars however will not be taken into account as colloquia.

At the end of the colloquium (after all questions have been answered and the organizer has thanked the speaker, not earlier!), you can ask the person that organized it to sign the list. This is usually a faculty member and the person that introduced the speaker.

Scheduled talks are posted at the various Biocenter entrances, bulletin boards and on the faculty website (for an overview, see <http://www.biochem.mpg.de/de/seminars>).

|    | Date: | Lecturer: | Confirmed by: |
|----|-------|-----------|---------------|
| 1  |       |           |               |
| 2  |       |           |               |
| 3  |       |           |               |
| 4  |       |           |               |
| 5  |       |           |               |
| 6  |       |           |               |
| 7  |       |           |               |
| 8  |       |           |               |
| 9  |       |           |               |
| 10 |       |           |               |
| 11 |       |           |               |
| 12 |       |           |               |
| 13 |       |           |               |
| 14 |       |           |               |
| 15 |       |           |               |
| 16 |       |           |               |
| 17 |       |           |               |
| 18 |       |           |               |
| 19 |       |           |               |
| 20 |       |           |               |
